OPERATIONS

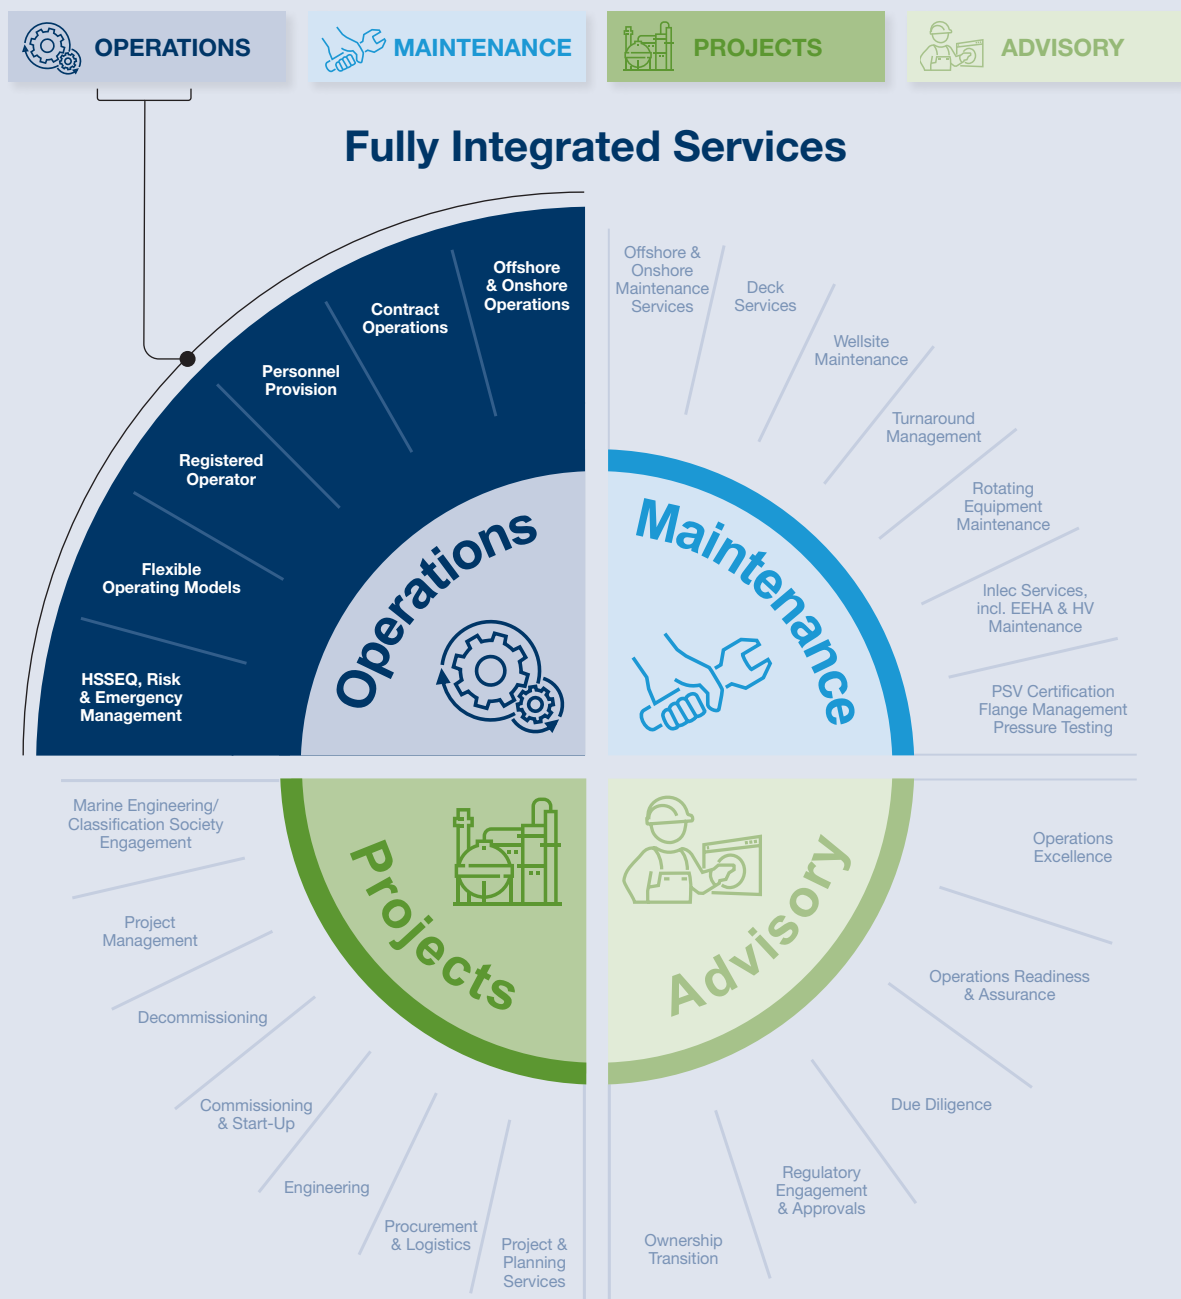

OPERATIONS

Upstream PS is a leading provider of fully integrated production solutions to the oil, gas, water and energy industries.

At Upstream PS, we work seamlessly with organisations across all phases of the asset lifecycle, continually seeking solutions to deliver technical and commercial success. We have a solid reputation and track record for providing safe, innovative, and sustainable solutions to asset production challenges.

We are experienced in managing contract operations across a full range of onshore and offshore production facilities from supporting early development of Australian oil and gas basins and managing safety cases to being at the forefront of well optimisation and ground-breaking carbon sequestration project delivery. Our operations support services are focused on safely maximising profits for our clients by optimising production, minimising deferrals, and protecting long term asset integrity. We work as “the Operator’s Operator”, aligned with the asset owner’s goals under a commercial model holding us accountable for our performance.

Making operations strategies a reality for our clients.

Our contract operations model and supporting management systems allow us to ensure compliance to legislative accountabilities whilst providing a range of high value low-cost solutions with low overhead structure that deliver improved performance commensurate with your asset.

Through our proven Plan, Operate, Maintain and Optimise framework, our strong safety culture and end to end support services; highly competent and multi skilled operator/maintainer teams are trusted by our clients to ensure assets and equipment maintain the highest

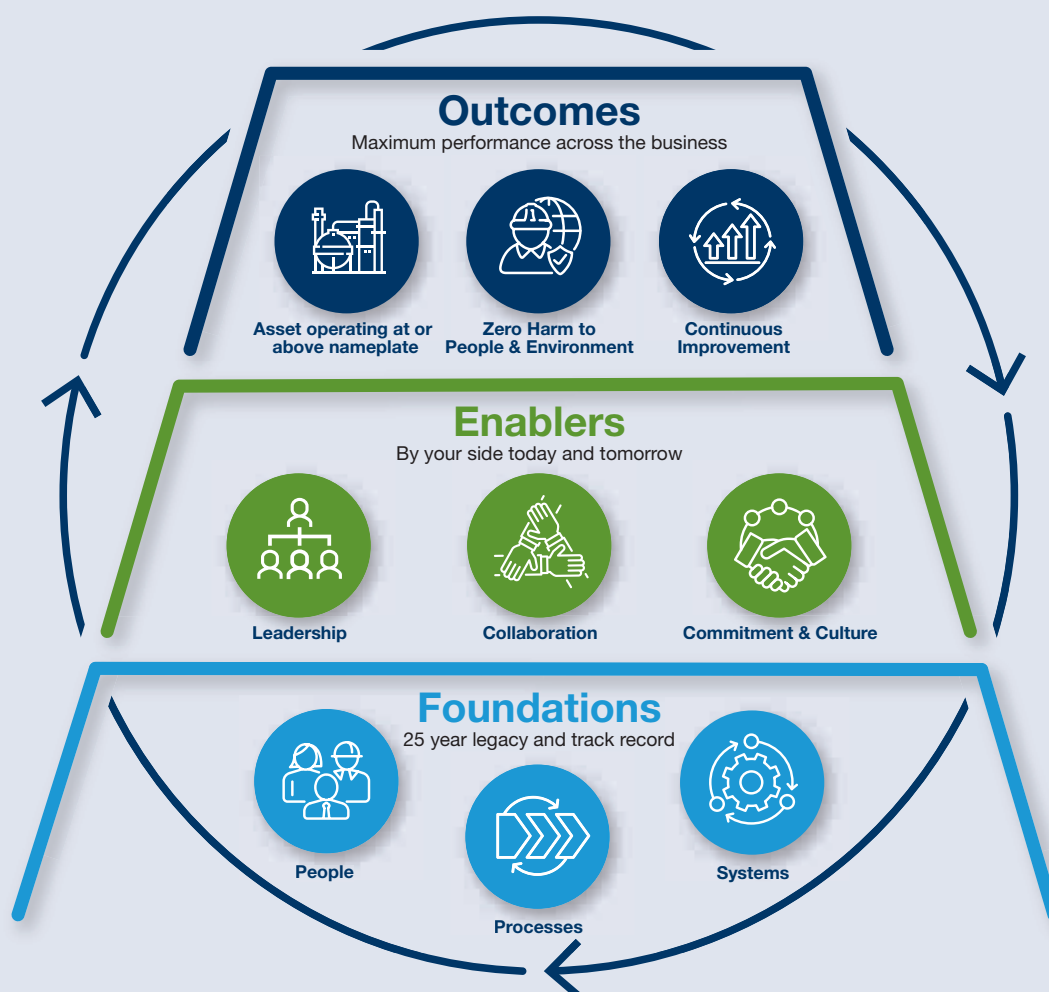

level of availability, extending the lifecycle of the asset wherever possible.

Our comprehensive range of operations services include:

- Offshore and Onshore Operations Services
- Contract Operations
- Personnel Provision and Crewing Support
- HSSEQ, Risk and Emergency Management Service
- Registered Operator / Safety Case Management
- Flexible Operating Models

Delivery Excellence Framework

Target: Operate and Maintain asset at technical, organisational and commercial optimum; **'The best you can be'**.

OPERATIONS

Operations Support Services and experience

Northern Endeavour FPSO, Laminaria-Corrallina Field

(2015 - ongoing)

Client

Australian Government (DISER)

Summary

Working on behalf of the Australian Government, providing core operations and maintenance services and planned pre-disconnection project activities. The FPSO is in lighthouse mode and is situated in the Timor Sea, approximately 550km northwest of Darwin.

Key Services

Operatorship Transition
Registered Facility Operator
Operations & Maintenance
Asset Integrity Management
Maintenance Engineering

AWE Perth Basin & Waitsia

(2009 - ongoing)

Client

AWE/MITSUI

Summary

Upstream PS provides operations and maintenance services, facilities engineering and project management services, maintaining high safety and operational performance whilst managing costs in a marginal field environment.

Key Services

Project Management
Operations and Maintenance
Pre-Commissioning & Commissioning
Asset Integrity Management
Maintenance Engineering

Shell Prelude FLNG Facility

(2018 - ongoing)

Client

Shell

Summary

Operations consists of a Floating, Liquefied Natural Gas (FLNG) facility, extracting, liquefying, and storing natural gas at sea, before it is exported to customers around the globe. Upstream PS have been providing Permit to Work Technicians safely managing ongoing activities offshore

Key Services

Provision of skilled personnel across Operations Coordinators, Production Trainers, Onshore Operations Team
Management of Change and Engineering Technical Admin resourcing to support Onshore Engineering Team

About Us

Upstream PS is a leading provider of operations, maintenance, projects and advisory services with a reputation for providing safe, innovative and sustainable solutions.
